

SOCIAL VALUE:

THE BUBBLE & SQUEAK BUS: A COMMUNITY RESOURCE

In partnership with the **Costain-Skanska Joint Venture (CSjv)**, we repurposed a retired **2003 Volvo Plaxton bus** into a vibrant community space for the charity organisation **Bubble and Squeak**. Originally decommissioned for not meeting current emission standards, the bus found a second life as an accessible learning and activity hub for young people through this meaningful joint initiative.

Working closely with CSjv, we fitted the bus with tables, chairs, and a television, transforming it into a **flexible overflow classroom**. Additionally, we fitted the outdoor area with astroturf, customised with designs by students at Old Oak Primary School, with similar turf added to parts of the bus interior to create a unique, green setting.

Now in use at Old Oak Primary School, **near the HS2 route**, the Bubble & Squeak Bus is a welcoming space for children and the local community to **learn, play, and connect**.

This project exemplifies our commitment to creating lasting social value and providing valuable resources for our communities.
