

# FUEL-IT:

SMART FUEL MANAGEMENT FOR YOUR SITES

## FUEL-IT:

FUEL-IT is an innovative smart fuel tank management system designed to enhance accountability and transparency of site fuel dispersals.

The system is one-of-a-kind in the UK, featuring fuel level monitoring, auto-replenishment, GPS tracking, dispensation authorisation, asset fuel dispersal tracking, and multi-network connection.

By minimising fuel loss, the system makes fuel management much more efficient, maximising fuel management efficiency. Allowing you to account for every penny you spend on fuel

**Lynch are now the approved distributor of FUEL-IT.**

Included in FUEL-IT is 'FUEL-IT Manager', a cloud-based digital telematics platform that provides real-time data, reducing costs and theft risks.

"This system has elevated our operations on site, allowing us to track our outgoings against the telematics data from Lynch plant. From a business point of view, it's been revolutionary"
