

ZERO EMISSION TRANSPORT SOLUTION

FULL ELECTRIC HGV:

Introducing the UK's first fully electric heavy goods vehicle (HGV):

- 80-tonne capacity Scania
- Special Types Vehicle CAT 2
- Zero Local Emissions
- Battery Capacity: 416 kWh
- Payload 45T

This electric solution addresses the challenges around modern logistics and highlights the benefits of decarbonisation on the UK's roads and our major projects.

This initiative is further supported by fleet expansion, with additional rigid units set to join the Lynch fleet in the second quarter of 2026.
