

NIGHT HEATER KIT

REDUCE IDLING. SAVE FUEL. STAY COMFORTABLE

Avoid unnecessary engine idling and reduce fuel consumption with the Night Heater. While traditional idling can burn through **8-12 litres per hour**, this advanced heater operates at just **0.12-0.24 litres per hour**, delivering powerful heating with exceptional efficiency.

Product Overview

This 12v diesel air heater kit is designed for **plant machinery**. It includes:

- **Air Top 2000 STC Heater Unit**
- **Heavy Duty MultiControl Timer** with 7-day programmable function
- **3m Extension Wiring Harness**
- **Single Outlet Ducting Kit**

This complete kit provides all the essentials for a straightforward installation, whether mounted inside or outside the vehicle.

A simple, compact and reliable solution offering:

- **2 kW Heating Output** – quick warm-up for cabins and cargo areas
- **Low Fuel Use** – from just 0.12 l/ph, ideal for overnight heating
- **Quiet Operation** – with advanced DP42 fuel pump
- **Fresh or Recirculated Air Modes** – adjustable comfort
- **Easy Maintenance** – with diagnostic-ready features
- **Modern Controls** – compatible with MultiControl HD & SmartControl

MultiControl HD Timer

The **7-day programmable timer** allows you to set one daily active start time. The intuitive interface means you can schedule your heating around your working week, ensuring your operators' cabs are always warm.

Make comfort and efficiency part of your daily routine.
