

ELECTRIC MINIBUS:

EFFICIENT, QUIET & ZERO LOCAL EMISSIONS

Our electric minibus fleet is transforming how we transport people around sites, depots, and projects. Fully electric and efficient, they offer a clean, quiet, and reliable way for our teams and equipment to move around site.

Key Benefits:

Zero Tailpipe Emissions: A sustainable solution that helps reduce our environmental impact with every trip.

Strong Daily Range: Up to 300km in city use and around 200 km combined daily usage range

Fast Charging: Recharge from 20-80% in as little as 40 minutes using rapid charge infrastructure.

Quiet Operation: Ideal for early starts, shift changes, or overnight operations with no engine noise and no vibration.

Flexible Seating & Storage: Comfortable for up to 7 people, with folding seats for added space when needed.

Energy-Smart Driving: Features like regenerative braking and eco-driving modes help extend battery life and efficiency.

Our Electric Minibuses are ideal for on-site workforce movement, shuttle runs between compounds, car parks, and work zones and low-emission transport in clean air and urban zones.
